District Heating Summit

District Heating Summit in Stockholm is a unique opportunity for you to discuss district heating trends and network with the leading experts and other industry professionals. We've gathered different stakeholders to discuss the possibilities and impact of digitalization within our industry. It can be everything from form challenges to solutions and tools in district heating. During these two days, you will have the chance to listen to lectures by leading experts and participate in panel discussions and workshops.

We know that we, in cooperation with you, will have the possibilities to create the future of district heating. Due to this, we would like to invite you to a conference for two days where we focus 100% on district heating.

On the agenda you'll find this:

- New EU-legislation affects district heating – how do we deal with that?
- *Dmitry Bochkalov, Senior Director Global Business Development, Danfoss*
- Future district heating – challenges, opportunities and external factors
- *Pernilla Winnhed, CEO Energiföretagen and board member of Euroheat & power*
- Digitalization of Södertörns fjärrvärme
- *Anders Björklin, Sales & Marketing, Södertörns fjärrvärme*
- How can we use the digitalization to develop future district heating?
- *Miha Bobic, Vice President DEN Danfoss*
- End-to-end optimized heating - it is about consuming energy at the right time when it is economical and climate-friendly to produce.
- *Jukka Aho, VD Leanheat*

It all started over 60 years ago...

District heating in Sweden started more than 60 years ago and there is a lot of knowledge and experience out in the field. If we look back, we might think that nothing has changed. But it has!

When it comes to technology development in buildings, we've gone from pipe heat exchanger to plate exchanger. A comment in the late '80s when the plate exchanger began to be used was: This will never work! And what happened... It works fine!

In many industries waste heat is generated this can be recovered for heating, hot water and ventilation to reduce energy consumption. In the past – it was just waste.

Looking ahead, what possibilities could digital tools bring to the future of district heating? Let's meet and talk about it!

I do hope to see you at our District Heating Summit in March.

Eva Holmén, Country Manager Danfoss Heating Sweden

Practical details

Location: Stockholm, Sweden, Haymarket by Scandic

Date: 11-12 of March 2020, starts with lunch at 11.30 and ends around 16.00 on the 12th of March

Cost: 1500 SEK per participant
